Our Services

DATA-DRIVEN RESOURCE

We collect data and then analyze, interpret, and map the results. We offer maps of every US state with active drilling and have created hundreds of thematic maps and analyses.

SUPPORT FOR ADVOCACY AND RESEARCH

We offer mapping and analytical services to nonprofit and academic partners working on all types of energy issues across the country and around the world.

COMMUNITY-BASED RESEARCH

We provide more than technical expertise and online resources. We also work in communities, collaborating with local stakeholders to document and learn more about the harms of extraction.
